RESIDENTIAL POOLS

Unstabilised chlorine - Shock disinfection

SHOCK®

Unstabilised chlorine

Extra fine granules

Benefits

- CALCIUM HYPOCHLORITE: STABILISER FREE
- FIXES GREEN OR CLOUDY WATER
- DISSOLVES INSTANTLY

Specifications

• Instantly-dissolving powder. • Disinfecting action. • Algicide treatment. • Average chlorine equivalent content equal to 78 % on the date of manufacture. • Minimum content in chlorine equivalent equal to 75 % at the date of manufacture. • Produces less than 6 % insolubles (distilled water). • Isocyanuric acid free (stabiliser). • Suitable for use with all kinds of water, including very hard water. • Compatible with all types of filtrations. • No degassing in comparison to isocyanurates. • The most concentrated calcium hypochlorite available on the market.

Composition

UFI : JPP5-T00F-R00U-G2H6 - Active Chlorine released from Calcium Hypochlorite (1000 g/Kg)

Instructions for use

Ensure that the filtration is on.

Adjust the pH to between 7.0 and 7.4

In open-air pools, maintain a stabiliser concentration of between 25 and 50 mg/l.

Distribute the product as close as possible to the water, opposite the backwash if there is any (be careful with the direction of the wind! risk of the product being projected into the eyes).

Shock chlorination on (re)commissioning or in case of green or cloudy water.

Check the chlorine content before allowing bathing.

Allow 15 grams per m³ of water.

Restore chlorine content.

Allow 1.5 grams per m³ of water to raise the chlorine content by 1 mg/l. In the absence of regulatory requirements, we recommend maintaining a pH between 7.0 and 7.4 with a minimum chlorine content of 1.5 mg/l (DPD1).

To achieve well-balanced water, maintain the alkalinity (T.A.C.) between 60 and 120 mg/l.

Caution before use

DO NOT MIX WITH ANY OTHER PRODUCT. NEVER DISSOLVE BEFORE USE.

Keep out of the reach of children. • The treatment must be carried out in the absence of bathers. • Application of this product is only authorised in pools that are connected to a waste water treatment plant. • Wash your hands immediately after use. • Wash your face/rinse your eyes immediately after accidental exposure. • Keep out of the reach of children. • Never pour water onto this product as it may react violently if it enters into contact with small volumes of water. • Store in a dry place away from direct sunlight in a well-ventilated area, at an average daily temperature that does not exceed 30°C. • The expiry date and the batch number appear on the packaging. • Decanting must be avoided. • Never pour unused product onto the ground, into bodies of water or into pipes (sinks, toilets...) or drains. • Dispose of unused product, its packaging and any other waste in compliance with local regulations.

Regulation

• H272 May intensify fire; oxidiser. • H314 Causes severe skin burns and eye damage. • H302 Harmful if swallowed. • H410 Very toxic to aquatic life with long lasting effects. Contact with acids liberates toxic gas. Warning! Do not use together with other products. May release dangerous gases (chlorine). • EUH031 Contact with acids liberates toxic gas. • EUH071 Corrosive to the respiratory tract. • EUH206 Warning! Do not use together with other products. May release dangerous gases (chlorine). • P101 If medical advice is needed, have product container or label at hand. • **P102 Keep out of reach of children.** • **P103 Read carefully and follow all instructions.** • P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. • P220 Keep away from clothing and other combustible materials. • P260 Do not breathe dust/fumes/gas/mist/vapours/spray. • P264 Wash hands thoroughly after handling. • P270 Do not eat, drink or smoke when using this product. • P273 Avoid release to the environment. • P280 Wear protective gloves/protective clothing/eye protection/face protection. • P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. • P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower]. • P363 Wash contaminated clothing before reuse. • P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. • P310 Immediately call a POISON CENTER/doctor. • P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. • P370+P378 In case of fire: use water for extinction. • P391 Collect spillage. • P370+P378 In case of fire: use water for extinction. • P403+P233 Store in a well-ventilated place. Keep container tightly closed. • P405 Store locked up. • P501 Dispose of contents/container to special treatment scheme according to official regulations. **Switzerland:** Partially empty packaging / container / box must be returned to the place of purchase or handed over to a special waste collection center. Best before: see date on packaging. Providing the plastic containers when empty are thoroughly rinsed out in the pool, they may be disposed of via the recycling scheme.
